## MEMORANDUM

**To:** Quincy Public Schools Principals, Staff, and Parents/Guardians

**Date:** August 3, 2022

**Re:** Asbestos Hazard Emergency Response Act (AHERA)

On October 22, 1986, an amendment to the Toxic Substance Control Act requiring schools to determine the presence of asbestos containing building materials in all school buildings was enacted. That amendment, called the Asbestos Hazard Emergency Response Act (AHERA) required that all school buildings be visually inspected by accredited inspectors and that bulk samples of suspected materials are taken where the material was not assumed to be asbestos. It further required that management plans be created for each individual building and that the maintenance and custodial personnel receive training. This document is the Asbestos Management Plan which provides the means and the methods to effectively deal with asbestos containing building materials.

All phases of asbestos inspection and management planning are reported in this plan including: response action strategy, priorities, scheduling of abatement activities coordination of personnel and evaluation of results. The plan has an additional function as a reporting document to that State. At the local level, the plan is available for general review by school district.

Quincy Public Schools has completed the 2020 3rd year re-inspections and reports are available for review at the City of Quincy's Public Buildings Department office. Please feel free to call Daniel Bythrow in the Public Buildings Department (781-888-5138) if you have any questions regarding this memo.
